Assignment 2 — Huawei AI & Cloud Ecosystem

Course: Artificial Intelligence (Machine Learning & Deep Learning)

Name: _____ Roll No: _____ Date: _____

This assignment introduces you to the core AI and Cloud products in the Huawei ecosystem that are used throughout this course. You will research each product listed below, explain its purpose in your own words, and describe a realistic scenario where it would be used in an AI/ML project.

Part 1 — Huawei AI & Cloud Product Overview

The table below lists the Huawei products referenced in this course, along with their main purpose.

Huawei Product / Service	Main Purpose
ModelArts	AI development, training, AutoML, model management and deployment
HiLens	Edge AI, computer vision, video analytics and AI inference on edge devices
Huawei Cloud EI	AI services/APIs including vision, NLP, OCR and speech
Huawei Cloud OBS	Object storage for datasets, models and files
MindSpore	Huawei's AI/deep-learning framework
FunctionGraph	Serverless functions; used in the course for automation/MLOps
Cloud Eye	Monitoring cloud resources and AI inference performance
ExeML	Automated/no-code/low-code model training, particularly used for image classification
Huawei Talent Online	LMS and certification tracking

Part 2 — Assignment Requirements

1. For each of the 9 products listed in Part 1, write a short introduction (4–6 sentences) explaining what it is and what problem it solves.
2. State the main purpose of each product in your own words (do not copy directly from Huawei documentation).
3. For each product, describe one realistic use case or scenario from an AI/ML project where it would be used (e.g., which product you would use to train a model, which to deploy it, which to monitor it, etc.).
4. Explain how at least three of these products could work together in a single end-to-end AI project (e.g., data storage → training → deployment → monitoring).
5. Include at least one screenshot, diagram, or figure (official or self-made) that illustrates how these products fit into the Huawei Cloud AI ecosystem.

Part 3 — Deliverables (submit all)

1. **Written Report (PDF/Word)** — covering the introduction, purpose, and use case for each of the 9 products, plus the end-to-end workflow explanation from Part 2.
2. **Diagram/Figure** — a visual (screenshot, diagram, or hand-drawn figure) showing how the products connect in a typical AI project pipeline.
3. **References** — a short list of the sources you used (official Huawei docs, course material, etc.).

Submission Requirements: Compress your written report, diagram/figure, and references into a single **ZIP file** and upload it to **TLMS**. Name your ZIP file **Assignment2_YourName.zip**. Ensure your report is clearly organized by product, with one section per product.
